MOBILE APP ENGAGEMENT

BatteryXchange mobile application can be accessed for free by each user. Not only can users get access to a portable charger, but we also provide opportunities for hospitals to share Important Information & resources with each user. This can be customized per location, per kiosk providing Items like but not limited to location specific Information, primary care directory & patient surveys etc. Our goal is to limit friction on giving patients the correct Information.

CONCLUSION:

Through our partnership with the Kansas Hospital Association, BatteryXchange is expanding across hospitals throughout Kansas to enhance the patient and visitor experience while strengthening community engagement. Our charging kiosks provide a valuable service by ensuring reliable access to mobile power while also serving as a digital platform to share important hospital services, health resources, and community initiatives.

We look forward to working alongside hospitals across Kansas to support their mission of delivering high-quality care and improving the health and well-being of the communities they serve, while helping extend their reach through modern, accessible infrastructure.
