

In March 2015, the Kansas Department of Health and Environment provided updated numbers on the impact of KanCare expansion by hospital. The distribution of the dollars is based on the providers current TANF adult population and adjusted for patients migrating between rural and urban providers settings. KHA modeled its expansion estimates on a three year average of total Medicaid volumes as reported by KDHE, with no adjustment for patients moving between rural and urban provider settings. This difference in methodology resulted in approximately half of the hospitals receiving more than estimated by KHA and half receiving less. The by-hospital annual impact below is based on the 10-year average increase in reimbursement from expansion.

* Totals do not match because data was not available to KHA for several facilities for the calculation. In addition, KHA did not have access to which facilities were included in the KDHE "Other Facilities" category, making it impossible to distribute the correct amounts between the remaining facilities.
