

Physician Forum

November 7, 2024

Noon - 1:00 p.m.

Virtual Event Hosted by

How AI at Work Will Advance Human Intelligence

Artificial Intelligence systems in health care are transforming the ways we communicate, collaborate and generate revenue. To capitalize on this revolution, hospitals and physicians need to rethink their data systems and readiness, clinician training, engagement and ethical frameworks. Gurpreet Dhaliwal, MD, will address each of these and ask what comes next when AI makes us better, stronger and faster.

Dr. Dhaliwal specializes in general internal medicine. He practices full time in the hospital, emergency department and outpatient clinic at the San Francisco VA Medical Center. He has been in practice for more than 20 years. He is a member of the University of California San Francisco Academy of Medical Educators and the UCSF Department of Medicine Council of Master Clinicians.

The Physician Leaders Forum, co-sponsored by the Kansas Medical Society and the Kansas Hospital Association, is convening Kansas physician leaders to foster discussion regarding critical issues impacting health and health care in Kansas. Join your peers for this unique event designed to enhance the ability of physicians and their organizations to prepare for the rapidly changing health delivery landscape.

Learning Objectives

At the end of this session, participants will be able to:

- Cite an example of AI making humans smarter;
- Name the Seven Stages of Robot Replacement; and
- Anticipate new skills and roles in an AI-enabled health system.

Virtual Platform

Zoom will be the platform used for this virtual event. You are encouraged to have a camera so you can engage in the group conversation following the presentation. Joining the webinar constitutes consent to audio and visual recording.

Continuing Education

Application for Continuing Medical Education credit has been filed with the American Academy of Family Physicians. Determination of credit is pending.

Code of Conduct
