

VIRTUAL MBQIP BASICS

November 8, 2024
10:00 a.m.-Noon
Webinar Connection Fee: \$25

The Medicare Beneficiary Quality Improvement Project is a quality improvement activity under the Medicare Rural Hospital Flexibility program of the Health Resources and Services Administration's Federal Office of Rural Health Policy. The goal of MBQIP is to improve the quality of care provided in Critical Access Hospitals. This project provides an opportunity for individual hospitals to look at their own data, measure their outcomes against other CAHs and work on initiatives to improve outcomes and provide the highest quality of care to each and every patient.

Hospitals needing a refresher on MBQIP requirements and/or data abstraction basics are encouraged to attend this virtual training session. Specific topics include:

- MBQIP quality data collection;
- CART data collection;
- Resources available in QualityNet to make reporting more efficient;
- Developing and implementing an action plan for data reporting;
- EDTC data collection; and
- Reporting EDTC Data to QHi.
